

## Training options and prices

Courses	Dates available	Standard	Return trainees, students*, ages 14-17 and current/ former TPA volunteers or partners <small>*Valid NUS or student card needed</small>
<b>1 day taster</b>	16 July - 17 August (weekdays) <i>(also available in multiples)</i>	£50	£40
<b>2 day taster</b>	16 July - 17 August (weekdays) <i>(also available in multiples)</i>	£100	£80
<b>1 week training place</b>	Mon 16 - Fri 20 July Mon 23 - Fri 27 July Mon 30 July - Fri 3 Aug Mon 6 Aug - Fri 10 Aug Mon 13 Aug - Fri 19 Aug or non-consecutive dates <i>(as available)</i>	£240	£220
<b>2 week training place</b>		£420	£380

Book online at <https://yat.digitickets.co.uk/tickets> or by phone on 01904 615505

For assistance with booking contact us on 01904 615505

For enquiries about the training contact us at [nottinghamcastle@yorkat.co.uk](mailto:nottinghamcastle@yorkat.co.uk) or on 07432694174

## We Dig the Castle 2018 proposed areas of investigation

Building recording of medieval fortifications in the Castle grounds

Building recording at and around the gatehouse

Test-pitting in the Outer Bailey

Excavation in Brewhouse Yard

## Other recent archaeological work at Nottingham Castle

In 2016 Trent & Peak Archaeology was commissioned to carry out archaeological work at Nottingham Castle as part of preparations for the Nottingham Castle Transformation project.

Trent & Peak Archaeology examined and recorded a total of 31 test pits and ten boreholes within the grounds of Nottingham Castle. Features of particular interest included evidence of the survival of the medieval Inner Ditch and post-medieval infilling activity. Structural remains and relict floor surfaces of medieval to post-medieval provenance were also recorded in both the courtyard and the tunnel connecting it to the Outer Bailey. In the Outer Bailey, evidence of shallow cut features and relict surface deposits of medieval to post-medieval provenance were encountered. In addition, investigations within the Outer Bailey produced evidence of the survival of the 17<sup>th</sup> century carriageway connecting the Outer and Middle Baileys.

Trent & Peak Archaeology was also commissioned by Nottingham City Council to determine and undertake a programme of archaeological investigation to inform the design of the gatehouse bridge consolidation works with the aim of maintaining the historical fabric. Three investigative trenches located on the bridge and approach aimed to expose and record the bridge fabric and associated layers and deposits, and to provide the structural engineers with information that would contribute to the selection of appropriate pinning techniques.

Excavation was undertaken in the Middle Bailey (now Castle Green) of Nottingham Castle in order to exhume the partial remains of an individual. The head and upper torso had been excavated during archaeological works undertaken in the 1980s, with the remainder left in-situ. The new works aimed to excavate and reunite the remaining bones with those excavated previously and stored at the Museum of Nottingham Life, Brewhouse Yard.
